

INGLÉS I

Unidad 1: **Reading Comprehension: "A Day in My Life"**

Warm-Up Activity

Step 1: Brainstorm (5 minutes)

“What do you think a software developer does in one day?”

- What time do they start work?
- Do they work alone or in teams?
- What kind of tasks do they do?
- Do they have meetings?
- Do they work at an office or from home?

Step 2: Vocabulary Match

Before reading the full text, match the following words to their definitions:

Word	Meaning
1) Stand-up meeting	a) A person who receives a service
2) Debug	b) A list of jobs to do
3) Task board	c) A short team meeting
4) Client	d) Feedback on a teammate's program
5) Code review	e) Fix problems in code

Step 3: Read the following text:

A software developer usually starts work at 9 a.m. They check their emails and join a short stand-up meeting with the team. In this meeting, they talk about what they do and what they plan to do. They do not write long reports in the morning. After the meeting, the developer opens a task board and chooses a new task. They write code and fix bugs. Sometimes, they review their teammate's code, but they do not do this every day. Do they take a break? Yes, they take a lunch break around 1 p.m. In the afternoon, they continue working, and sometimes they meet with a client. At the end of the day, the developer checks the progress, plans tasks for tomorrow, and finishes work before 6 p.m. Do they work late at night? No, they prefer to stop working on time.

Step 4: True or False: Read the statements and write T (true) or F (false).

1. The developer always writes long reports in the morning. ☐
2. They take part in a short daily meeting. ☐
3. After lunch, the developer stops working. ☐
4. The developer chooses tasks from a task board. ☐
5. They usually work late at night. ☐
6. They sometimes meet with clients. ☐

Step 5: Write a paragraph about your daily routines. You can look at the table below for help.

Time of Day	Typical Activities
Morning	Check messages, attend stand-up, plan tasks
Midday	Coding, debugging, lunch
Afternoon	Code reviews, testing, meetings
End of day	Review progress, plan for next day, reflect on work

Step 6: Translate the text in *Step 3* into Spanish.

Step 7: Underline examples of verbs used in Simple Present tense in the same text.
